

From Peak Pressure to Perfect Delivery – Using Technology

Do you have the right technology in place to take on peak season logistics?

Peak season creates pressure at every stage of the logistics journey.

of organisations failed to deliver on time and achieve order accuracy during peak periods¹

of customers experienced an issue with a delivery operator in 2025²

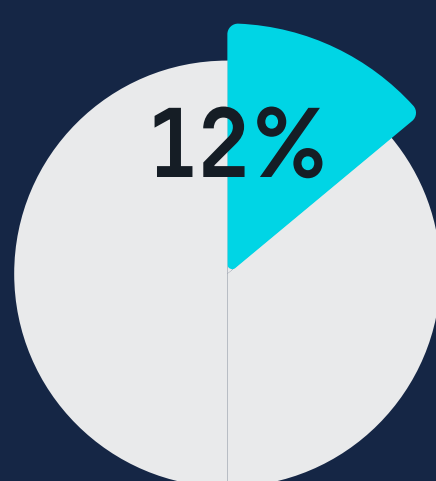

Leverage the power of tech to improve your peak season performance

From planning through to delivery and beyond, here's how it could help your operation achieve up to...

PLAN

reduction in planning time compared to using manual processes

increase in fuel efficiency after implementing journey management technology

OPTIMISE

STREAMLINE

5,000

miles/year

=

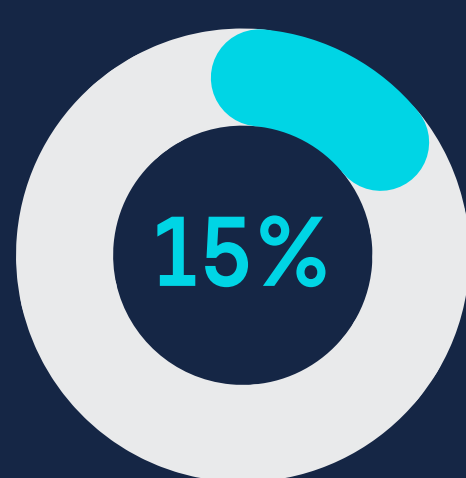

£2.3k

in fuel costs

...saved after upgrading to Remote Tacho Download

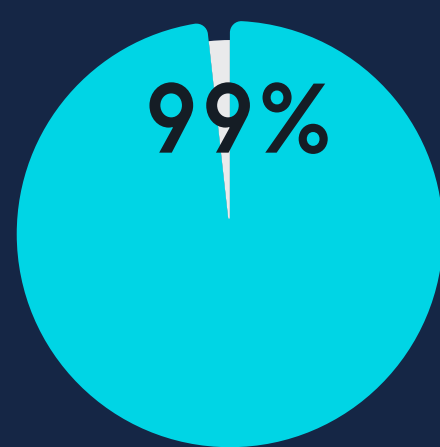

COMMUNICATE

reduction in delivery delays using in-cab driver communication technology

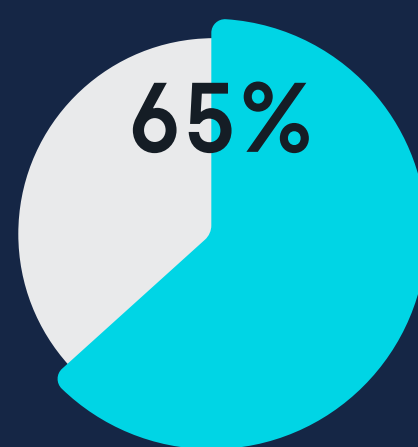

PROTECT

Increased pressure on drivers means they're more likely to take risks

of drivers in low risk category

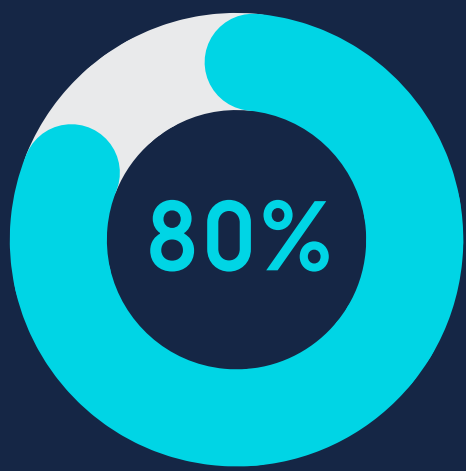

&

reduction in accident payouts

...after implementing driver performance technology

EXECUTE

reduction in admin time when operators use delivery management tools

PROVE

Busy times

=

More deliveries

=

Increased mistakes

Reduce the amount of goods returned by **10%** with an electronic proof delivery (ePOD) system
