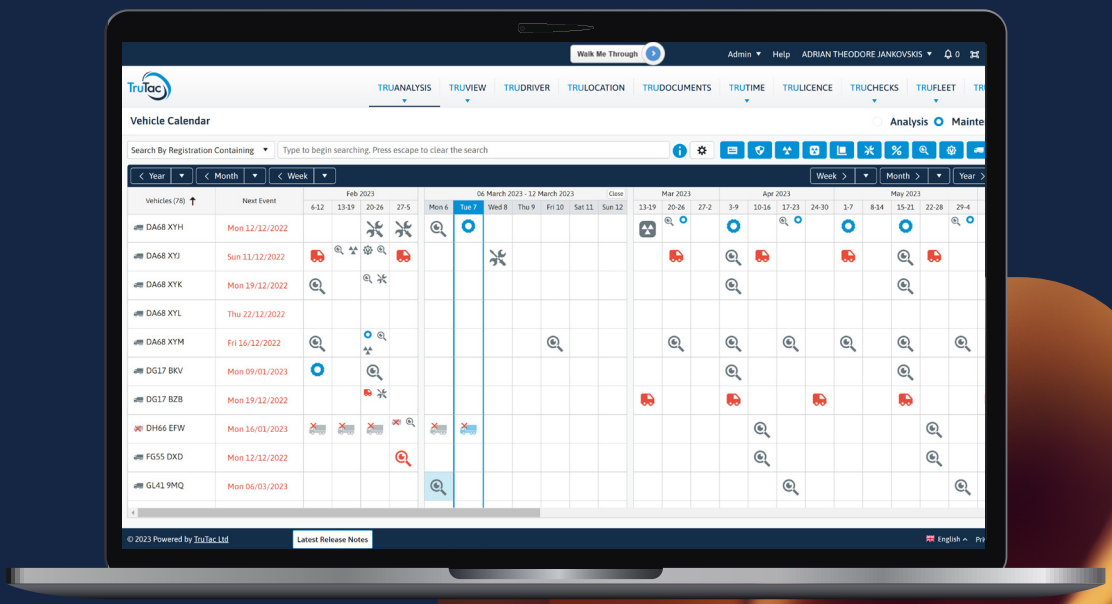
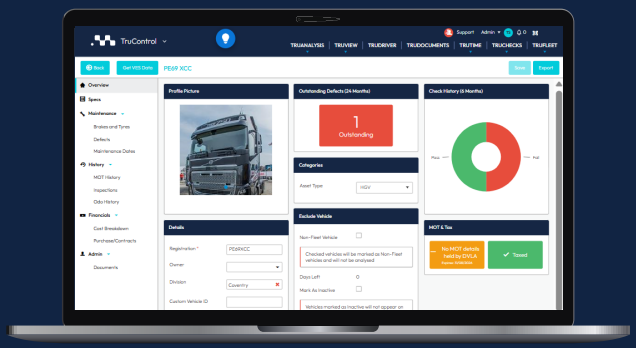
Fleet

Fleet is simple-to-use and enables users to plan and control all aspects of day-to-day fleet & Asset management.

Covering everything from vehicle history, maintenance records, safety inspections, defect reporting, rectifications through to audit checks. Fleet provides real-time updates on maintenance schedules, online storage for compliance documents, interactive dashboards and alerts.

DVSA EARNED RECOGNITION





Fleet offers everything you need to manage fleet maintenance...

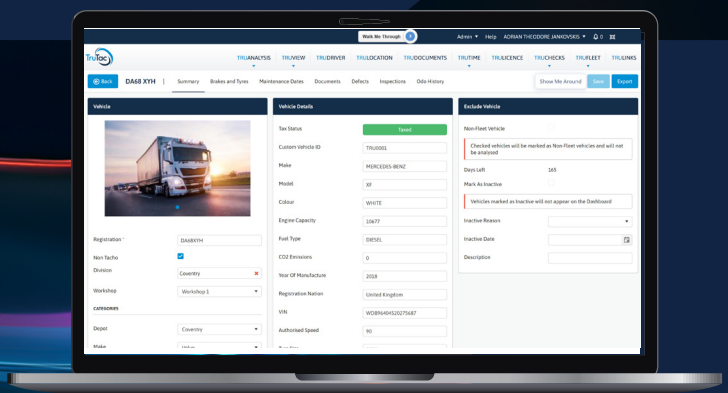
- Simplify maintenance planning – live view of all planned maintenance events
- Including vehicle inspections, MOTs, services, LOLER checks and repairs
- Manage regular, efficient and well-documented safety inspections
- Garage and off-road vehicle control - remove administration difficulties when using multiple garages
- O' Licence checks at a glance - easily track numbers of authorised O'Licence vehicles and trailers, including tax, insurance and tachograph calibration dates
- Fully compatible with Microlise's modular suite of Compliance software

Workshop

Workshop provides seamless planning of all vehicle maintenance for your workshop managers.

- Real-time maintenance schedules
- Online document storage
- Interactive dashboards and alerts
- Live visibility of vehicles and drivers
- Workshop integration
- Earned recognition approved

DVSA EARNED RECOGNITION



Documents (Premium)

Documents Premium saves time and administration through digitalisation

Features

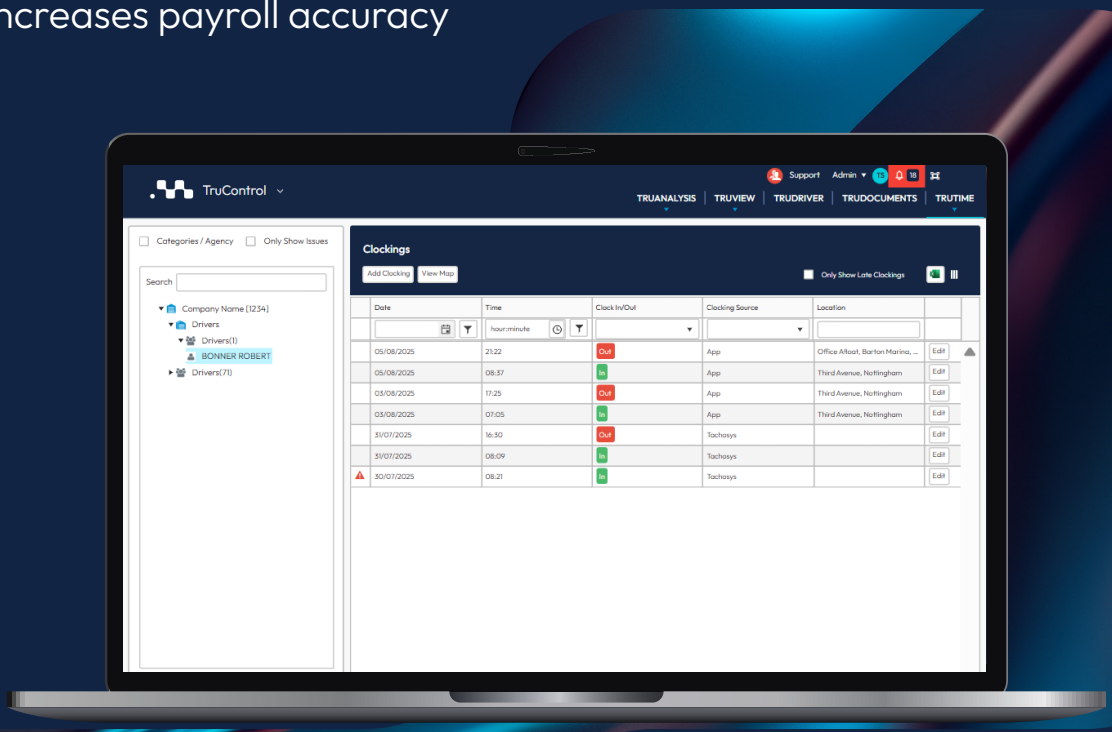
- Digital document storage
- Electronic signature capture
- Available online or via application
- Share business content and media
- Custom request manager
- Auditable reporting

Workforce

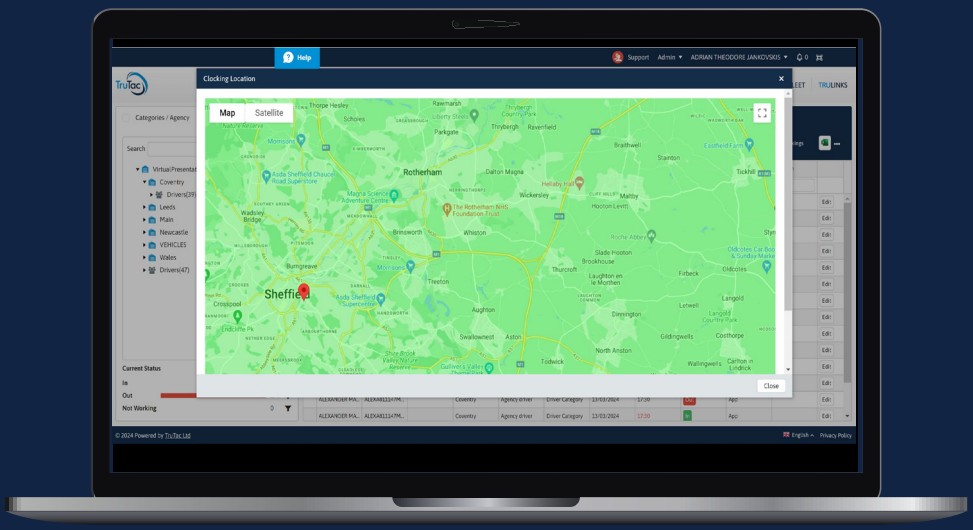
Workforce is a web-based clocking system for analysing and managing working time which delivers a complete view of duty information including clocking and tachograph data.

Accurately record attendance and holidays using digital tachograph driver cards, smart cards or the employee app and provide clocked hours versus tachograph data for payroll. Used in conjunction with Analysis records, Workforce provides accurate lead in/out for complete working time directive (WTD) compliance.

- Web-based clocking system for WTD
- Reduce labour costs
- Captures manual duties
- Increases payroll accuracy



- Save time & money
- Reduce labour costs
- Increase payroll accuracy



Manage Clock In / Out

Instantly see who has clocked in and out and conduct a roll call. Manage and amend clockings at the touch of the button, with full audit information if a clocking is altered.

Manage Holidays & Absence

Manage holiday allowances, carry over, Bank Holidays and remaining holidays all in one place.

Feature Rich Application

Includes 'No Show' notification button to provide warning alert. Holidays can be requested from the app which shows remaining holiday entitlement.

Record Skills & CPC

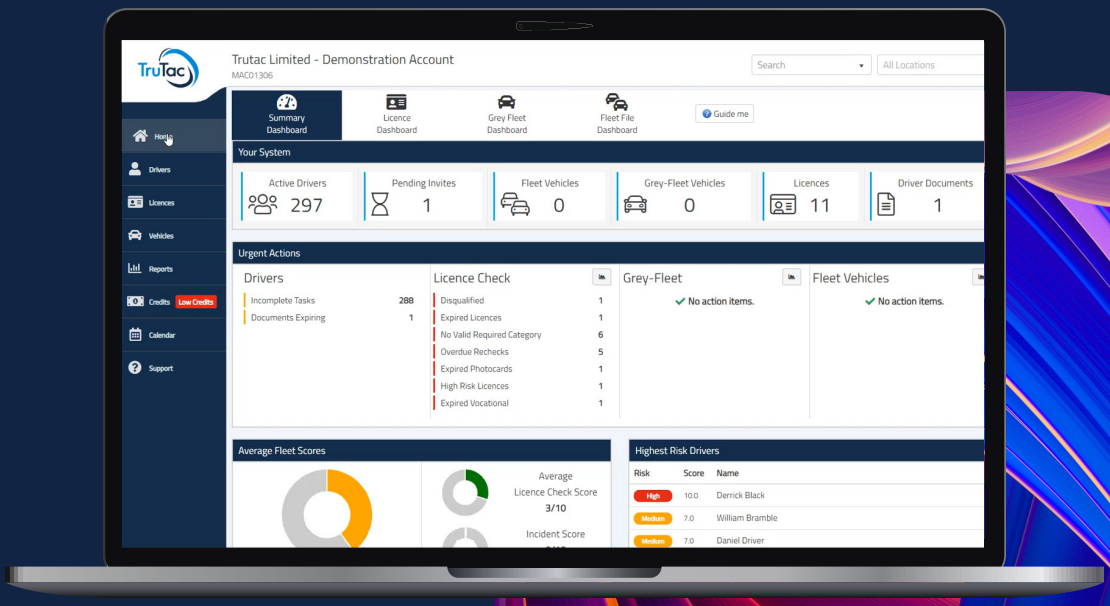
Provides an overview of training history and automatically adds training course dates to the calendar. Record driver CPC training and status (with DQC expiry via Licence if purchased).

Workforce includes :

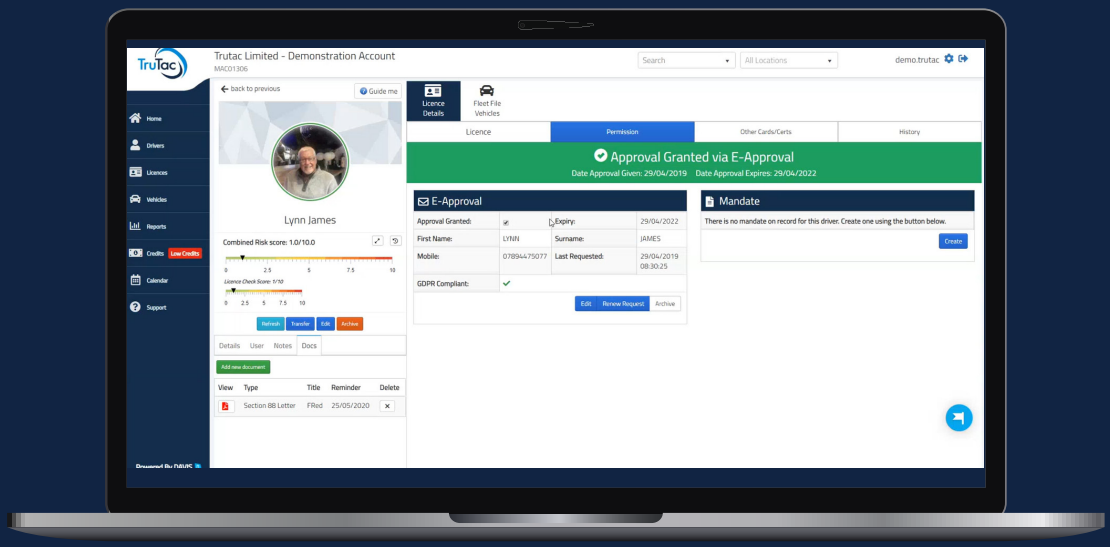
- Integrates with Analysis for full control
- Configurable user security levels
- Manage holiday and absence
- Detailed reports and exports
- Reduce labour and admin costs
- Intelligent shift planning
- Increase payroll accuracy
- Full compliance and WTD solution
- Full training, online help and helpdesk support

Licence

Licence provides online verification checks of UK driving licences, tachograph and CPC information for compliance and insurance. The system removes administrative burdens and includes alerts, dashboards which highlight key areas of concern.



- Check Licence validity
- Driver CPC and tacho
- Record, report and audit



Licence allows companies to demonstrate a duty of care to drivers and improves auditing procedures whilst seamlessly integrating with Analysis.

- Secure online access
- Full management control
- Minimise licence infringement risk
- Reduce manual administration
- Demonstrate duty of care to drivers
- Fully compliant with Data Protection Act and GDPR
- Full training, online help and helpdesk support
- Fully integrated with Analysis

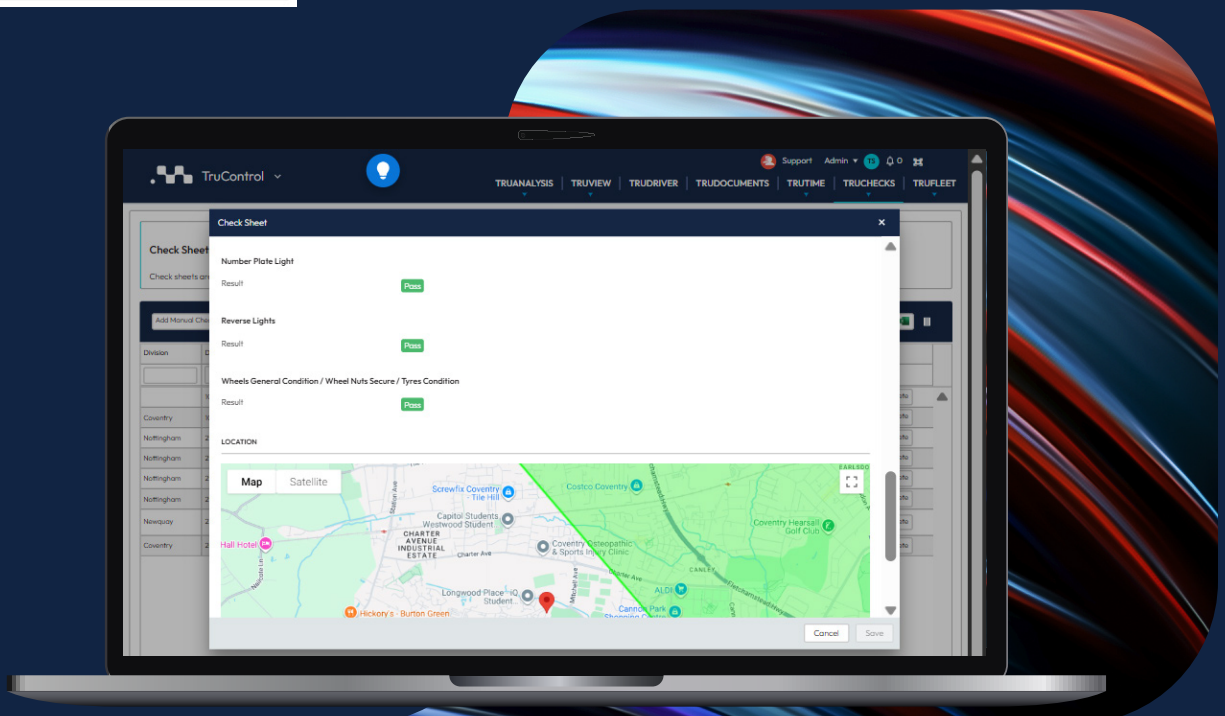
Licence includes :

- Driving licence checks online
- Validate correct information on a licence
- Current endorsements and points on a licence
- Driver licence status and entitlement to drive
- Satisfy compliance and insurance requirements
- Confirm vehicle categories and check not disqualified

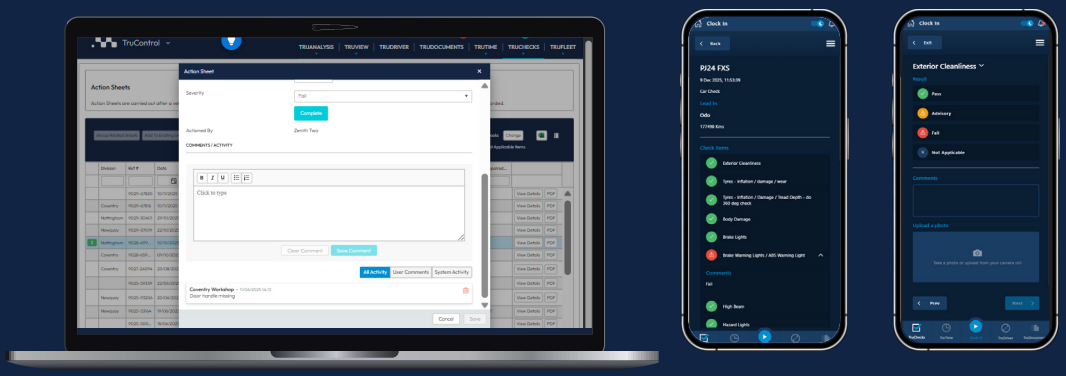
Checks

Checks is a mobile app that allows drivers to complete their daily vehicle walkaround checks. Transport managers can minimise vehicle downtime with instant defect notifications, fast remedial action and efficient service control, by utilising type specific and configurable check lists for all vehicle types and trailers, along with full time stamped audit trail.

DVSA EARNED RECOGNITION



- Instantly report defects
- View historical checks
- Compliance audit trail



Long gone are the days of paper-based walk around checks. Checks guides your drivers, step-by-step, recording each defect and feeding a timestamped form back to the office for managers to action. From a driver's perspective, Checks allows for photo-capture of defects plus timestamped proof that they've carried out their daily checks.

- Accurate and timely vehicle defect management
- Minimise vehicle downtime
- Reduce paper based admin
- Real-time vehicle visibility
- Enhances driver debrief and performance reviews
- Full training, online help and helpdesk support
- Web based reporting system and email alerts
- Create and Configure accident and clandestine check sheets

Checks App:

The app is easy to use and intuitive, enabling users to get instant feedback and providing a full, time-stamped audit trail. Transport managers can minimise vehicle downtime with instant defect notifications, fast remedial action and efficient service control.

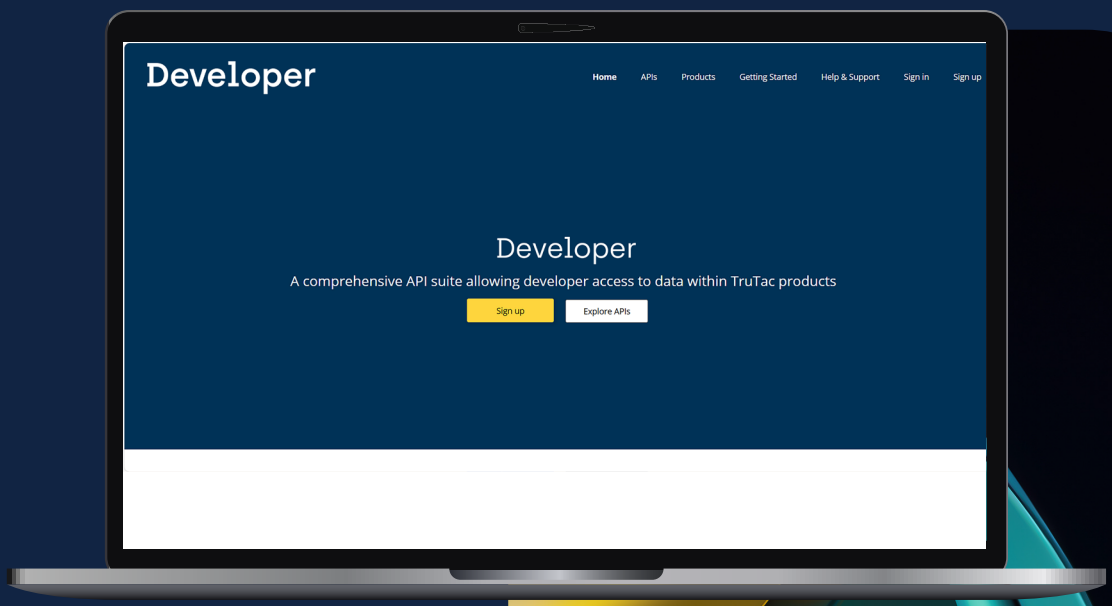
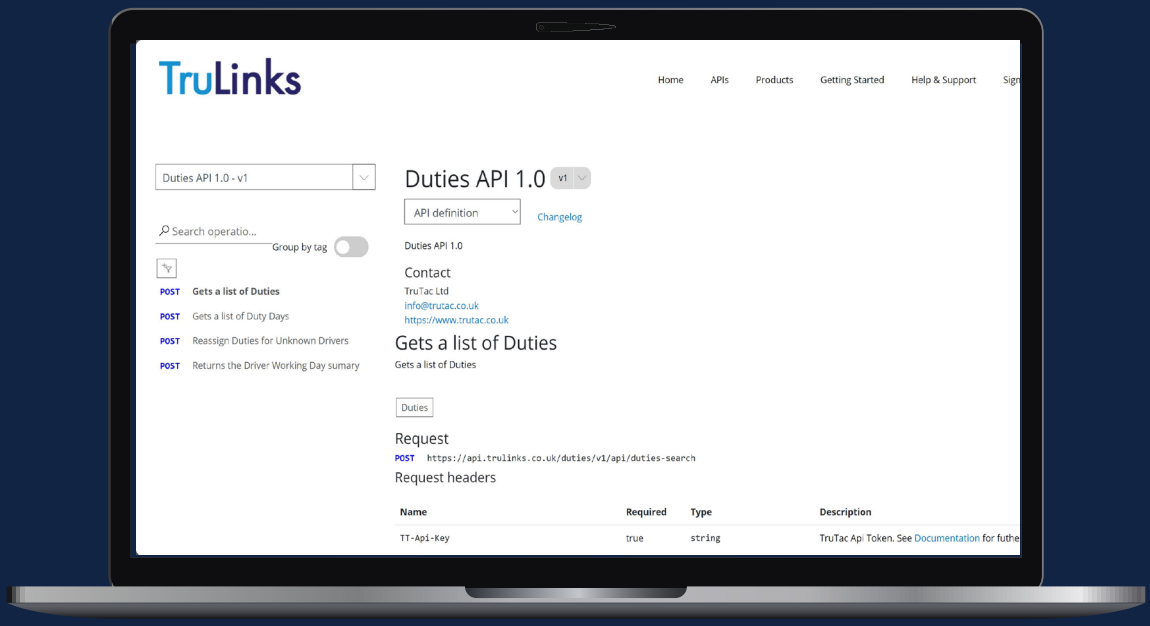
Developer

Developer is a comprehensive API suite allowing developer access to key data within Microlise products. We captures powerful data that can be invaluable, feeding other systems, reports and ultimately, critical business decisions.

Developer allows access to key data and removes the need for manual intervention or data duplication.



- API suite
- Powerful data
- Developer portal



The Developer API suite allows you to directly interact with the API in the developer portal.

There is comprehensive API Documentation available for developers and describes how to use the APIs and includes code samples in multiple languages.

The suite is available at www.trulinks.co.uk and once enabled a user can create a developer account and generate the API key.

APIs available includes :

- Tachograph analysis reports
- Vehicle checks sheets
- Drivers data
- Duties data
- Fleets data
- Time data
- Vehicles data
